CORE CAPABILITIES

- **Red Teaming & Penetration Testing:** Adversary-focused testing to identify exploitable weaknesses, validate detections, and improve defensive readiness.
- **Red/Purple Team Operations:** Collaborative offensive and defensive testing mapped to realistic adversary behaviors and measurable security outcomes.
- **Adversary Emulation:** Human-led and agentic-enabled approaches supporting repeatable attack-path testing, control validation, and adversary behavior simulation.
- **Cybersecurity Assessments:** RMF / NIST-aligned reviews, technical control validation, risk prioritization, and remediation-focused reporting.
- **Cyber Resilience & Security Validation:** Evaluation of security controls, detection capabilities, and defensive effectiveness against realistic threats.
- **Cyber Exercises & Training:** Technical exercise support, scenario/inject development, facilitation, after-action analysis, and instructor-led cyber training.
- **Government & Prime Support:** Technical SME, surge, and defined work-package support designed to integrate with existing federal and prime-contractor teams.

DIFFERENTIATORS

- **Operationally grounded:** Leadership brings 20+ years of operational security experience across defense and federal environments.
- **Offense-to-defense perspective:** Combines advanced penetration testing and adversary emulation with practical defensive validation and remediation guidance.
- **Small-business agility:** Focused technical support, direct senior-level engagement, rapid coordination, and clean deliverables.
- **Prime-team fit:** Structured to augment established delivery teams with specialized cyber expertise rather than compete for broad program scope.

MISSION ALIGNMENT

Frameworks & Methods: NIST RMF • NIST SP 800-53 • NIST SP 800-171 • MITRE ATT&CK; • HSEEP-aligned cyber exercise support
